

WordPress File Structure

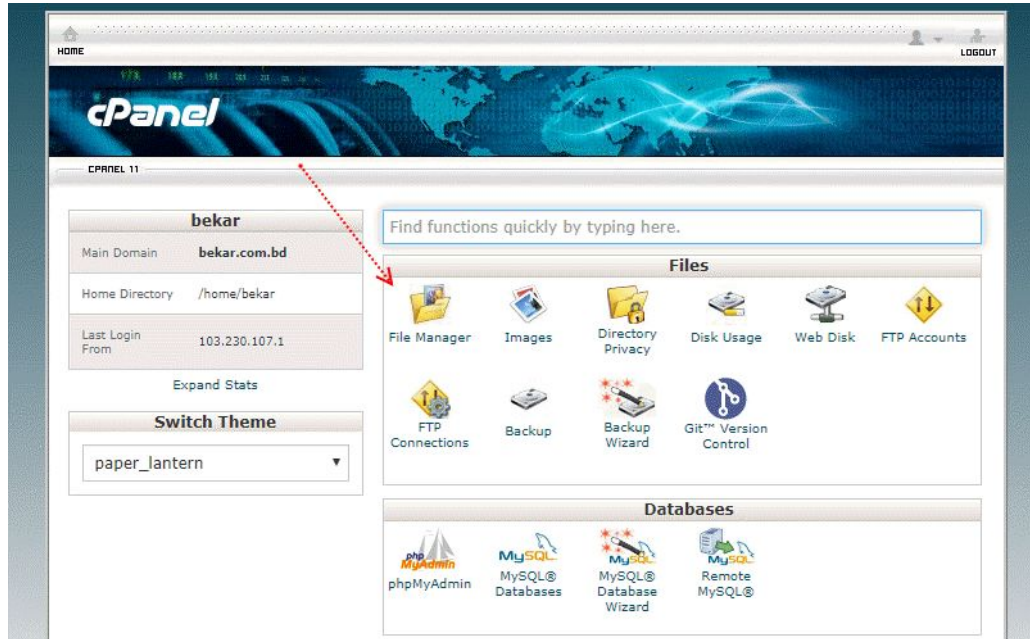

Why this is important?

Because we work with files.

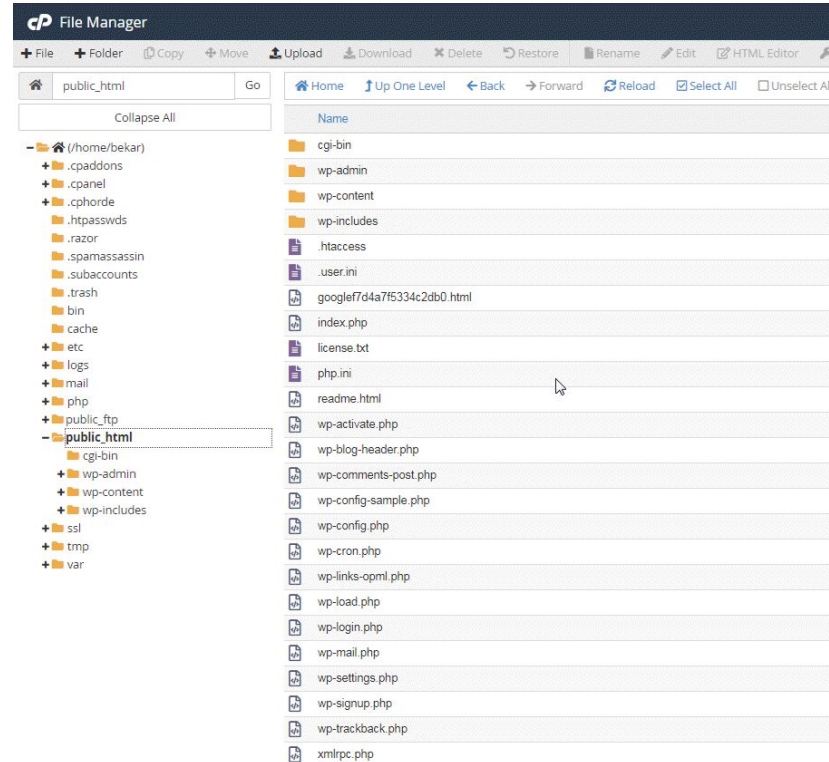

1. We customize files.
2. We upload files.
3. We create files.
4. Override/replace files. (for our needs)
5. Delete files. (By mistakes)
6. We write on files. (.php, .js, .css)
7. We search for files. (Where is this come from)
8. Target files to hack(for hackers)

Where i can see the files?

Go to file manager from your hosting panels or Cpanel you will able to see files.
